

**Protect our Water
Supply and Streams!**

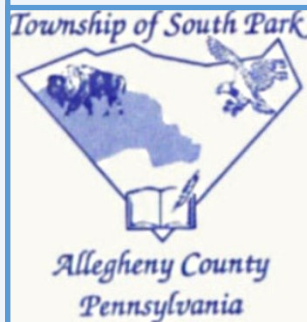

**Clean up after
your Puppy!**

**Don't let Dog Waste
Get Into the Stormwater!**

**Pet Waste is Bad
for Human Health.**

**For More Information on
MS4 & Stormwater visit:**

management_ms4.php](http://www.southparktp.com/stormwater_management_ms4.php)**

**Other Ways to
Protect our Water
Supply and Streams!**

- **Clean up after your Pets so that harmful organisms, including E. Coli and Salmonella, do not end up in the storm sewer system!**
- **Use non-toxic or less toxic household cleaning products!**
- **Use commercial car washes!**
- **If washing your vehicle at home, park in the grass to keep the detergent runoff from entering the storm sewer system.**
- **When mowing the lawn, don't blow grass clippings into the street, as the clippings can easily enter the catchbasins of the storm sewer system.**
