

**SAVE THE DATE**  
**SEPTEMBER 17, 2022**  
**Bethel Park – South Park Municipal Authority**  
**Open House – Career Day**  
**10:00 am till 3:00 pm**

The Bethel Park Municipal Authority is hosting an Open House – Career Day at the Piney Fork Wastewater Treatment Plant in South Park Township. Residents can come take a tour of our state-of-the-art facility and see how we are doing our part to protect the environment. The water sector industry is one of the largest and most important in the world. Due to the aging work force and the need for major facility upgrades, an estimated 3 million jobs will be filled in the next 10 years. This is not just workers in the treatment facilities, the industry needs workers in all the trades to upgrade the facilities to meet the stringent regulations of their NPDES Permit. As part of our open house, the **Builders Guild of Western Pennsylvania** ([www.buildersguild.org](http://www.buildersguild.org)) will be present to promote career opportunities in all trades. The unique aspect of the water sector industry and trades is, you can learn a trade, get paid, and have a successful career with great benefits and retirement with **No College Debt**.

The Piney Fork Treatment Plant is a highly automated facility; students looking for a career in computer science and control automation can see how those careers fit into our industry. Professional Engineers play a major part in the design and construction of all treatment facilities. The treatment plant is in final design of a major upgrade; students looking to go into the engineering field can see firsthand how professional engineers go about designing and constructing large projects that take years to complete.

“Hope To See You There”
