

Emergency Pipeline Relocation Notification

2025

Work in your neighborhood

As part of our commitment to provide safe and reliable natural gas service to our customers, Columbia Gas of Pennsylvania will be making a significant investment to relocate natural gas pipelines in your neighborhood.

What to expect

Our work affects customers along Library Road, State Route 88 (SR0088), from the intersection of Brownsville Road to 6505 Library Road in South Park Township. Work is expected to begin May 5, 2025, and continue into the week. Construction crews will be working nightly between 7 p.m. to 7 a.m. Monday through Friday, with Saturday and day work possible.

During this time, you may see our contractors or employees performing work and inspections in the area and public rights-of-ways. Due to the nature of this project, there will be periods of construction-related noise, but crews will be working to minimize noise disruptions as much as possible during the overnight hours.

You also may notice survey flags or stakes in the ground, which are used to locate underground facilities before the project begins.

Staying safe

Motorists traveling through or near the Columbia Gas work zone should exercise extreme caution and be prepared for slowed or temporarily stopped traffic and single lane closures. Motorists should keep a safe distance between vehicles, reduce speed in work zones, and obey flaggers and all posted signs, including detours and parking restrictions. The focus of the crews is to accomplish this work as quickly, efficiently, and safely as possible.

Columbia Gas apologizes for any inconvenience. We appreciate your patience and cooperation on this important project to maintain safe and reliable natural gas service to homes and businesses in the community.
